## Objectives of the company:

- 1 - elegant and high quality.
- 2 - to protect the environment in the Kingdom of Saudi Arabia .
- 3 - industry Products to facilitate the work of companies and Municipalities.
- 4 - New ideas contribute in finding solutions in the field of waste collection and transport.
- 5 - Action research and technical studies, appropriate design and elegant products.
- 6 - Work hand by hand with officials in the relevant sectors to find the best solutions to the problems they face in the field.

Since the beginning of the construction boom in Saudi Arabia and the spread of residential neighborhoods, new cities and urbanization of villages, the idea began with Sheikh Mohammad Ali Rubeaan finding products on cleanliness, environmental protection and support the rising of Saudi. He has crystallized the idea to establish a factory of mechanisms and hygiene equipment's before 33 years, the factory production and the development of mechanisms and hygiene equipment.

Believing of the need that community pressing to serve these mechanisms has devoted all efforts by crew engineering and administrative and technicians have a lot of experience and competence in this field, for the continued development of mechanisms and equipment for hygiene, as well as to invent new equipment and machinery interested hygiene and environmental protection.

This resulted in the opening of several branches in major cities of customer service and provide market demands in the right time and place, and we open product support of spare parts and maintenance and help contractors in the completion of their projects as required, also contributed to the factory to the success of many projects cleaning and maintenance in the neighboring states as well as Arab Gulf states and African countries.

The continuous development in all aspects of plant was converted from an individual institution to a company and has increased its production capacity to keep pace with the development and meet the growing demand from customers.

This development will continue, God willing, as long as this entity exists so it has become a company logo in it.

**(For the better development is everyone's responsibility).**

## REFUSE EQUIPMENT MFG. CO. In brief...

One success on the level of industrial action only, followed by the success of another, much has been achieved satisfactory results on the ground, according to company's plans to achieve the highest results in the long term.

This has been reaping the benefits of effort and hard work through the good image reflected in the Saudi market, and the Arab world which culminated in customer satisfaction in all the company's products. As a result of engineering studies and research that accompanied the march of the success of the products ended up in the business market to be a witness to the quality that characterized the company where she earned ISO certification ISO 9001 international quality control to provide it to the highest international standards.

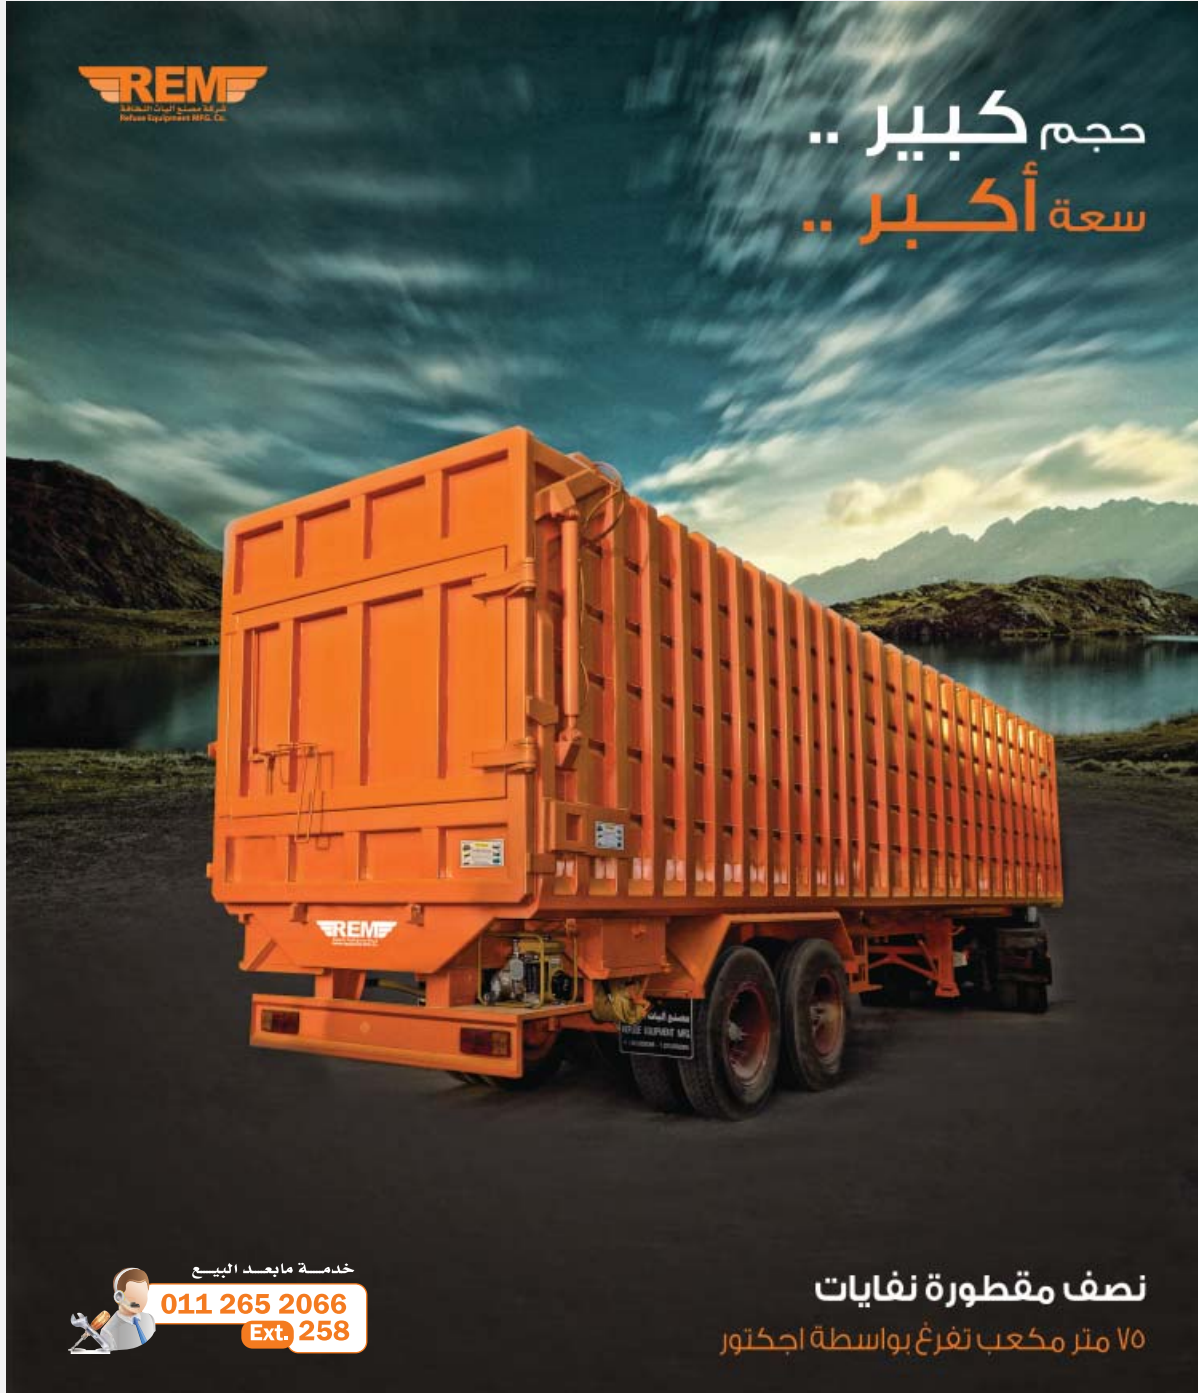

## Word Chairman..

By more than a quarter of a century, there have been great difficulties faced by the municipalities and cleaning companies and all the relevant environmental protection, so as to not provide a lot of machinery and equipment for cleanliness in our local markets and the purchasing it from foreign companies only leading to financial burdens and delay in implementation of projects in addition to the damage inflicted on the environment.

With the development of industrial and urban renaissance in Saudi Arabia we must consolidate our efforts to work on finding solutions to the provision of services needed by companies and agencies specialized in the field of hygiene and environmental protection.

Thanks to God we came with the idea of making a factory mechanisms hygiene, this company that specialized manufactures machinery and equipment for cleanliness and equipment construction. The project was implemented on the ground to start manufacturing and development and new product innovation that serve this area. Today thanks to God and thanks to the efforts of workers our factory became one of the largest factories in Saudi Arabia, and the Middle East.

Beside the provision of social services, that the companies has provided such as the provision of job opportunities for young people and create an environment suitable for industrial and commercial investment and contribute to the payment of the country's economic wheel. What we want for the future is to continue development of ideas and solutions relating to cleanliness and disposal of waste of all kinds,

as well as contributing with the companies in achieving the demands of society, the implementation of their actions as required innovation and manufacturing products, finding factories and national sister manufactures. These products we have made us achieved three main objectives in the social, commercial and industrial, and these goals are creating job opportunities for young ambition in these factories and raising the national economy and creating product industry and national 100% and this is what we are working hard to achieve it, God willing.

Mohammad Al- Rubeaan

## Word CEO ..

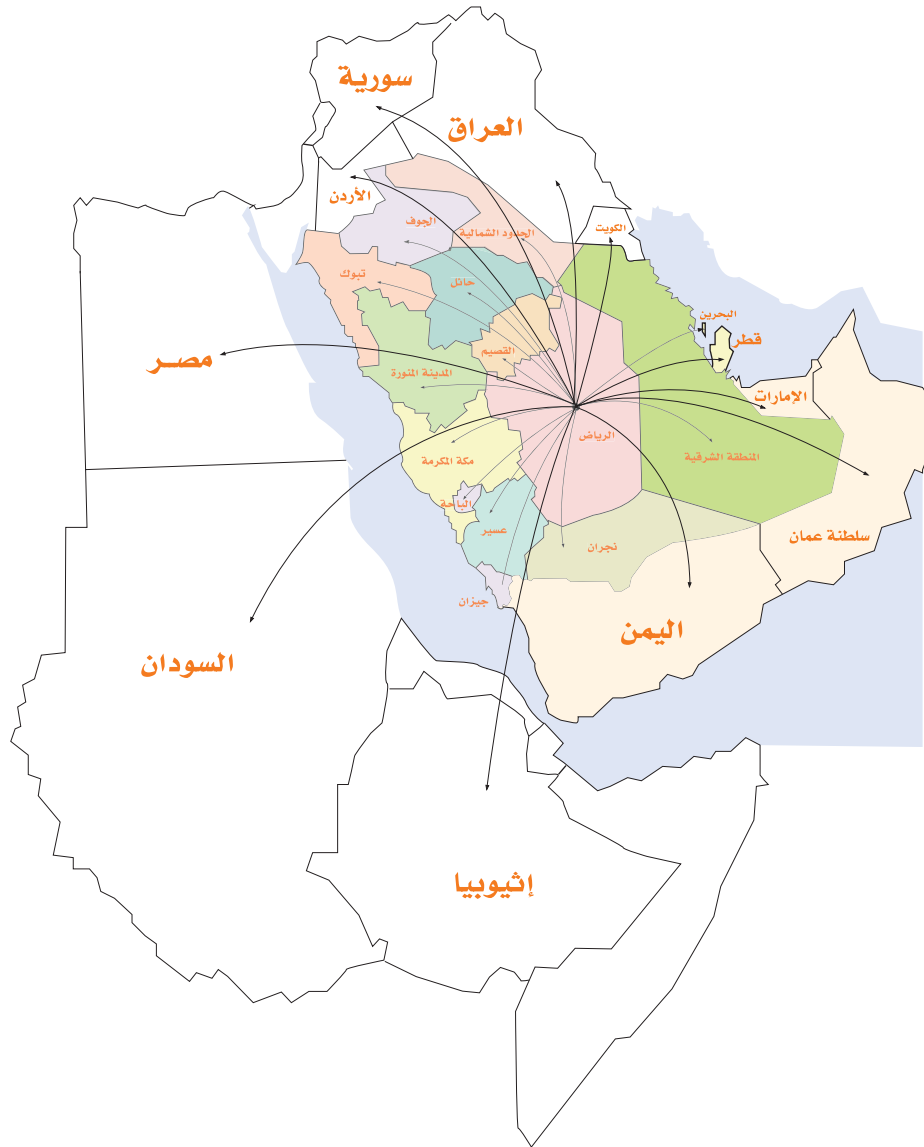

Founded factory and established in 1982 in Saudi Arabia, as a leader in the field of cleaner cities began to focus on producing what projects needs of mechanisms and equipment of the cleanliness of Compressors, Vacuum types, skips, etc., has stretched the search process for years. Several monitoring vision sound and comprehensive economic planning in order to create a company able to provide environmental services in the form of scientific and practical right to become the stone of a good yield and allow all healthy environments. All that launched factory management philosophy cleaning mechanisms of the principle of a spirit of responsibility and mutual respect, as they work through a distinct environment and with a solid structure to foster greater productivity and emphasizes the principle of respect for customers and employees and perform special services work cleaner cities or maintenance and operating to the fullest that many service providers are preparing to provide «integrated services» but these services often lack the strength and effectiveness For our part we have made great efforts over the 33 years of our work where the development of mechanisms in used cleanliness of cities and projects operating and maintenance form that gives the required work efficiency and increases the efficiency performance through sophisticated production often helps to reduce the reliance on labor, as well as reduce the rate of pollution.

Through productive alliances with companies with prestigious international names in the field of cleaner cities and environmental sanitation in Europe and North America, which resulted the launch of many solutions long-term effectiveness of service delivery hygiene and environmental sanitation. The company has developed infrastructure establishment of a separate administration for projects cleaner cities and environmental sanitation, were provided with the best talent that has long experience as cleaning companies cities and environmental sanitation in Saudi Arabia, as well as the company technical team have based project management cleaner cities and environmental sanitation abroad for training and to identify new solutions to provide cleaning services and technological development of mechanisms and equipment hygiene, as well as the company provides project management with all technological means used operations cadastral container and distribution paths and employment by locating satellite. Realistic and do the study for the project by sending a team to inspect the sites required services in the scope of the contract and determine numbers and quantities that lead to the provision of services and developed a factory mechanisms hygiene strategy to perform the services charged in projects cleaner cities and environmental sanitation based on the performance of the service to the fullest as a first priority, as well as preservation of the environment and prevent pollution from waste through use of the types of custom produced to manage projects cleaner cities and environmental sanitation production line of its own (such as Dumper, Dunbar PCB, buried containers)., which helps to reduce the number of labor to the project.

The company developed in mind interest environmental health and informing citizens and residents of the importance of preserving the environment and the means and instructions supposed followers to get rid of waste security without causing pollution streets and surroundings whereabouts waste through the dissemination of public awareness programs and participation in conferences related to the development Municipal work (as a conference of municipal work Gulf in 2011 under the auspices of His Royal Highness and the Deputy Prime Minister and Interior Minister and His Highness the Minister of Municipal and Rural Affairs), has received Refuse Equipment MFG. Co. wide reputation as the first national company manufactures products of mechanisms ,equipment and trucks used for projects to cleaner cities and environmental sanitation making it a competitive advantage with other companies. thanks to the presence of teams specialized maintenance and also to ensure replacement of all products used in their projects we can provide services in the field of cleaner cities and environmental sanitation without interruption or delay due to the suspension mechanism or stomach.

## COMPANY PRODUCTS

## Company products:

I have discuss the company's management to support it apart from competitors in addition to product quality great diversity of products, has joined the company a large family of products that are in the same area to serve all business specialized maintenance and construction and cleaner cities, and these products come in first class presses waste all stings and as well as luxuries garbage truck with small capacities and large-capacity plus container lifting devices according to customer demand and high quality, where it can be said that a company plant mechanisms hygiene is the most share company in the Saudi market, compared with other Saudi companies due in to enjoy presses waste produced by a company factory hygiene mechanisms by force and amplitude and contemporary architectural design that positively affects the ease of operation.

As the company has produced to add to the Garbage Compactor, Road Sweepers, Transfer Trailers, Containers, Stationary Compactor, Static Compactor, Dumper, Telescopic Aerial Platforms, Hook Lifts, Water Tanks, Fuel Tanks, Vacuum & Jetting Tanks etc., many types of containers, in addition to other customer-specific products by demand poultry, cattle and trailers feed sorting equipment in cattle farms and as many other products characterized Company produced

As for the existing products are now completed the development of the Garbage Compactor inherent a keep pace with modern equipment and machinery industry hygiene, this approach, management company we are still working to provide modern products serving human and maintain a healthy environment.

33  
years

## 33 years in environment service

Thirty three years of tender what makes us proud of our achievements over our history, thirty years of hard work and the uniqueness in our field. Since the establishment of the company the target decree carefully to achieve successfully. The need became an idea, became a success. And now we have become god's help and discourage members of the company are proud of what has been achieved in the service of the homeland and the arab world. We do not know the meaning of stop and we do not know failure, our steps and confident about the development. Our history has proven to succeed. So we won the confidence of our customers and became a place of their attention, services added to civilization beautiful color and maintained the beauty in many ways.

So it was a factory hygiene mechanisms, Continuous development and innovation, Modern products for the service of the environment, Ambition exceeded the limits of success, Industrious youths and features a Saudi national affiliation. So that's what we're proud of.
